

Robertson Environment Protection Society
June Meeting – 7:30pm Friday 13th June 2014
Robertson Community Centre Caalong St Robertson

Speaker: Dr John Black

Research Management Consultant who previously worked as a Chief Research Scientist in CSIRO, Assistant chief of the Division of Animal Production and Officer-in-Charge of the Prospect laboratory in Sydney

Topic: “Saving the ancient rock art on the Burrup Peninsula in WA from industrial encroachment.”

John left CSIRO in 1996 to establish a research management company where he now manages research programs for a wide range of rural Research & Development organizations and private companies.

His activities include work for the beef, dairy, pig, poultry, grains, fodder and honeybee industries. He is interested particularly in understanding factors constraining the application of science to practical agriculture and how these constraints may be overcome. This talk will be on another area of interest which has been saving the ancient rock art on the Burrup Peninsula from industrial encroachment.

All welcome - a light supper will be provided. Entry with a gold coin donation
