

Robertson Environment Protection Society
October Meeting – 7:30pm Friday 9th October 2015
Robertson Community Centre Caalong St Robertson

Speaker: Associate Professor Julie Old

Lecturer in Animal Science Water and Wildlife Ecology, School of Science and Health,
Western Sydney University.

**Topic: “WomSAT - a citizen science-based website
where citizens can log sightings of wombats and
their burrows”**

As a leading researcher in the development of the marsupial immune system, and a strong research profile in wildlife immunology and conservation, Julie has over the last few years become particularly interested in sarcoptic mange in wombats. As a consequence of regularly seeing badly affected wombats, Julie recently developed WomSAT.

Julie hopes to increase public awareness of wombats, and the threats, particularly sarcoptic mange, to wombats.

All welcome - a light supper will be provided. Entry with a gold coin donation
